Viridian

EDUCATION | intelligent building technologies

WE CREATE SMART CONNECTED BUILDINGS

viridian is an intelligent building technology company **committed to your success**. We achieve this by providing energy efficient, flexible and scalable technology solutions for your campus or school.

OUR APPROACH

Directors of Facilities want to be sure that decisions they make today will not limit their choices tomorrow. As building systems become more interconnected and more interdependent, it's critical to have a partner who has a **complete understanding of base-building technology**. We can help to make your school more energy efficient, more comfortable and more secure while promoting a safe and optimized learning environment. All of this can add up to an improved bottom line.

ADVANCING YOUR GOALS

viridian can help you to advance any goals you may have that relate to school security (video and access), building automation, networking communications and system integration. We accomplish this by providing:

- The latest in Connected Building Technologies
- Cost-Effective, Flexible and Scalable Solutions
- Open-Protocol (non-proprietary) Solutions
- High Quality, Customized Design
- Highly Trained, Uniformed Professional Staff
- Timely Completions
- Full Preventative Maintenance with 24/7 Emergency Response

WE PROTECT PROJECT & SERVICE OUTCOMES

In today's IP-based environment, it's important to ask key questions early in the process when considering base-building project and service intitiatives. viridian knows what questions to ask at the right time time in order to avoid surprises. It's like having a building technology advocate as part of your team.

A TEAM YOU CAN TRUST

The technical expertise, ingenuity and commitment of our employees is our single biggest differentiatior and the driving force behind our success.

SERVICES OFFERED:

- Building Automation Systems & Integrations
- CCTV & Access Control
- PA & Intercom
- Fibre Optic & Network Cabling
- Preventative Maintenance

> " viridian helped us to design and install a new open-protocol building automation system through a collaborative needs assessment. The system was set up in a timely and cost-effective manner with all the relevant data required to monitor and control our building, helping us to improve energy efficiency and optimize our learning environment. "

Anatoli Guelfgat, Facilities Manager
Kingsway College School
