

FOOD & BEVERAGE | intelligent building technologies

WE CREATE SMART CONNECTED BUILDINGS

viridian is an intelligent building technology company **committed to your success**. We achieve this by providing energy efficient, flexible and scalable technology solutions for your buildings.

OUR APPROACH

The food & beverage sector is energy-intensive, hygiene-critical, and highly regulated. Building and plant managers want to be sure that decisions they make today will not limit their choices tomorrow. As building systems become more interconnected and more interdependent, it's critical to have a partner who has a **complete understanding of smart-building technology**. We can help to make your plant more energy efficient, more comfortable and more secure while promoting a safe, optimized work environment. All of this can add up to an improved bottom line and enhanced competitiveness.

ADVANCING YOUR GOALS

viridian can help you to advance any goals you may have that relate to building automation, physical security (video and access), networking communications and system integrations.

We accomplish this by providing:

- The Latest in Connected Building Technologies
- Cost-Effective, Flexible and Scalable Solutions
- Open-Protocol (non-proprietary) Solutions
- High Quality, Customized Design
- Highly Trained, Uniformed Professional Staff
- Timely Completions
- Full Preventive Maintenance with 24/7 Emergency Response

WE PROTECT PROJECT & SERVICE OUTCOMES

In today's IP-based system environment, it's important to ask key questions early in the process when considering base-building project and service initiatives. viridian knows what questions to ask at the right time in order to avoid surprises during implementation. It's like having a building technology advocate as part of your project development team.

A TEAM YOU CAN TRUST

The technical expertise, ingenuity and commitment of our employees is our single biggest differentiator and the driving force behind our success.

SERVICES OFFERED:

- Building Automation Systems & IoT Integrations
- CCTV & Access Control
- PA & Intercom
- Fibre Optic & Network Cabling
- Retrofit & Upgrade Services
- Preventive Maintenance

“ In the food and beverage sector, precision is everything. A well-integrated BAS doesn't just control the environment, it safeguards product integrity, ensures regulatory compliance, and drives measurable efficiency across every square foot of your facility. ”
